EDUCATION

Arizona State University

Major: Computer Science; Software Engineer; GPA: 4.0

Tempe, AZ

December 2027

WORK EXPERIENCE

Wellnova Mobility

Irvine CA & Gilbert, AZ

Software Engineer Intern Lead

Aug 2024 – Now

- Built workflow automation systems using Make (Integromat) to streamline lead management, scheduling, customer communications, and operational processes.
- Designed and deployed an **AI voice agent using Vapi** capable of answering inbound calls, collecting customer information, scheduling appointments, and routing inquiries to the appropriate team members based on customer needs.
- Optimized website speed, performance, and responsiveness, improving user experience and reducing page load times across the platform.

Black Smith Trade Inc.

Gilbert, AZ

Information Technician

Jun 2022 – May 2024

- Developed a custom pricing script to automate Amazon book listings, replacing manual data entry with a system that calculated prices based on real-time market averages.
- Built a database tool to track book conditions and inventory levels, ensuring all documentation was digitized and easily searchable across multiple warehouse locations.
- Designed a logical sorting system for inventory logistics, improving the speed and accuracy of shipments to various distribution centers.

White Tulip Health Foundation

Remote - Fairfield, NJ

Full-Stack Intern

Jun 2020 – Sep 2020

- Created new web pages based on internal requests and developed content related to health webinars.
- Conducted thorough website audits to identify bugs across all pages and resolved issues to improve site functionality and user experience.

Projects

Resume Analyzer AI

[Github](#) | [Website](#)

- Built an AI-powered resume analysis system using NLP techniques (TF-IDF, cosine similarity) to evaluate candidate-job alignment, demonstrating practical exposure to LLM-adjacent technologies and applied machine learning workflows.
- Implemented Cosine Similarity algorithms and TF-IDF vectorization to calculate precise match scores, improving the efficiency of the initial recruitment screening phase.
- Streamlined data extraction from multiple document formats (PDF/DOCX), extracting key technical skills and experience to provide actionable insights for recruiters.

Cozybxd - Collaborative Movie List Website

[Github](#) | [Website](#)

- Engineered Cozybxd, a full-stack social media discovery platform (Next.js 16, TypeScript, Supabase/PostgreSQL) for collaborative media discovery with shared watchlists, group history, attendance logging, ratings, and reviews.
- Built and scaled backend APIs for auth, teams, invites, chat, notifications, swipe voting, and media sync; integrated TMDB + OMDb + YouTube with fuzzy search/ deduplication to improve discovery quality and reduce duplicate entries.
- Implemented advanced product features including expiring invite codes with role-based access, anti-spam cooldown and profanity safeguards, and Gemini-powered group recommendation workflows that generate explainable, structured suggestions from watch history.

Other Experiences

Sema Foundation Non-Profit

Chandler, AZ

Group Manager

Sep 2021 – August 2024

- Created event schedules, supply checklists, and planning documents for Youth Council and Sema Foundation programs.
- Tracked volunteer responsibilities and progress, ensuring all members stayed on schedule and completed their service requirements.

ADDITIONAL

Technical Skills: Advanced in JavaScript, HTML/CSS, React, Python, C++, C, Data Analysis, Pandas

Languages: Fluent in Turkish and English

Certification: [Data Analysis with Python](#)
